ABSTRACT

Presents the results of South Carolina's Trident Technical College's (TTC's) 1999 graduate follow-up survey report. Graduates were surveyed and results were obtained for the following items: graduate goals, employment, placement rates, graduates in related fields, when job obtained, job finding methods, job locations, job satisfaction, job preparation, salaries, continuing education, processes and services, life skills accomplishments, and demographics by age group, gender, ethnic origin, and attendance characteristics. The 924 respondents reported higher satisfaction with processes and services than in past years. Rates increased in all 1999 categories except two. Full-time attendance by graduates has declined steadily since 1982. The 1999 full-time attendance of 56% by graduates is the lowest of any year. The two most successful methods of finding out about jobs are information from friends and relatives and direct application to the employer. However, a number of graduates said they used the Internet to find their job. The appendix includes the State Board for Technical and Comprehensive Education graduate placement rate results for all programs, the allied health sciences, arts and sciences, business technology, community, family and child services, hospitality, tourism and culinary arts, industrial and engineering technology, nursing, and public service according to certificates, associate degrees, and diplomas awarded. (VWC)

1999 Graduate Follow-Up Report

Trident Technical College's office of Institutional Research conducted the 1999 Graduate Follow-Up Survey during the winter and spring of 1999-2000. The main objective of the survey was to determine how many graduates were working in jobs related to their fields of study or were continuing their education. Other goals included obtaining data on graduates' employment, their satisfaction with various aspects of the college and suggestions for improvement.

In October 1999, the survey was mailed to 1153 graduates of Summer 1998, Fall 1998 and Spring 1999. A second questionnaire was mailed to non-respondents of the first mailing. Telemarketers or faculty members contacted graduates who did not respond to the mailings. A total of 924 graduates responded to the survey for a response rate of 80 percent.

This report is based on the number of respondents completing the questionnaire. All respondents did not answer all questions; consequently, the number of respondents varies from question to question.

Results

Graduate Goals

The survey asked graduates to indicate the main reason they attended TTC. While "Learn skills for a new job" was the goal most frequently stated for all categories, females chose this goal more frequently at 70 percent than males at 56 percent. One other goal where males and females differed was "Learn skills for a current job." Twenty-one percent of males chose this goal, as opposed to only 9 percent of females. Table 1 presents graduate goals by gender.

Table 1: Goals in Attending TTC by Gender

THE RESERVE TO SERVE	Femal	e	Male	65	Total	Scare S

Total	539	78	59	. 8	88	13	689	100

^{*}Three graduates of Off-Campus sites are included.

Employment

The percentage of respondents in each of the various employment status categories remains consistent with past years, although the combination of those employed or in school rose 3 percent over last year. Table 3 presents the employment status of all 1999 respondents, including those not employed in a related job.

Table 3: Employment Status

	Number of Respondents	Percent of Respondents
Full time	568	64
Part time	93	- 11
Active duty military	9	1 - 1 - 1 - 1 - 1 - 1 - 1 - 1 - 1 - 1 -

Unemployed, not seeking work because of problem	13	2 2 2
Total	794	100

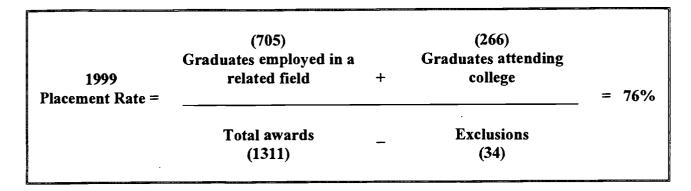

Placement Rates

The State Board for Technical and Comprehensive Education evaluates each program annually for viability. The data below are based on the number of awards earned and not the number of graduates during the 1998-99 year (i.e., some graduates obtained awards in more than one program). The SBTCE placement rate is calculated according to the following formula:

BEST COPY AVAILABLE

Exclusions include active duty military, full-time homemakers, retired persons and those not seeking employment because of a disability or another reason. Placement rates for individual programs are included in Appendix A.

Graduates in Related Fields

At the time of the survey 587 graduates were employed in jobs related to their fields. The number of respondents to each question varies. The following characteristics of employment were calculated for graduates in related jobs.

When Job Obtained

Of the 587 graduates in jobs related to their fields, 563 responded to the question regarding when their job was obtained. Fifty-seven percent of the 563 graduates reported obtaining their job after graduation. Diploma graduates were most likely to have obtained their job after graduation (83 percent). The graduates who most frequently obtained their job prior to attending TTC were those who earned Certificates (26 percent). In comparing job start dates by gender, females were more likely (62 percent) than males (49 percent) to have obtained their current related job after graduation. Tables 4 and 5 present job start dates by award and by gender.

Job Finding Methods

Graduates reported they first found out about their job from friends or relatives and direct application to the employer (29 percent each). All methods were used at about the same percent by males and females, except for SC Job Service, which was used by 10 percent of males and by 2 percent of females.

When analyzed by ethnic origin, all 3 categories (White, Black and Other) tended to use job finding methods in the same proportions except for newspaper advertisements and SC Job Service. A larger proportion of Whites (18 percent) and Blacks (13 percent) used newspaper advertisements than Other Minorities (9 percent). Almost the reverse was true for usage of SC Job Service. Eighteen percent of Other Minorities used SC Job Service compared to 4 percent of Whites and 9 percent of Blacks. Table 6 presents job-finding methods by ethnic origin.

Job Locations

The largest number (71 percent) of TTC graduates reported their job was located in Charleston County. The 71 percent represents a steady increase of 10 percent since a low of 61 percent employed in Charleston County in 1994. The second largest proportion of jobs was reported in Berkeley County at 13 percent, and Dorchester was third at 8 percent. Table 7 presents job locations.

Table 7: Locations Where Jobs Obtained

Location	Number of	Percent of Respondents
Charleston County	386	71
Berkeley	69	13
Dorchester County	43	8
Other South Carolina Counties	16	3
Outside South Carolina	29	5
Total	543	100

Job Satisfaction

Graduates were asked about satisfaction with their current job. Of the 498 graduates in related jobs, 478 (96 percent) said they were satisfied. There was little difference when the results were analyzed by demographics.

Job Preparation

Of the 494 graduates in related jobs, 454 (92 percent) reported TTC adequately prepared them for their current job or upgraded their skills. When analyzed by campus, 36 (10 percent) of those attending the Main Campus said they were not adequately prepared while 4 percent of Berkeley graduates and 3 percent of Palmer graduates said they were not adequately prepared.

Salaries

Graduates were asked to identify their monthly income from their principal job. Salary choices were listed in \$300 increments. The median annual salary for the 319 graduates working full time in a related job was \$20,802 and ranged from \$8,994 to \$37,794. When salaries were analyzed by gender, females reported a lower annual median salary at \$19,288 than males at \$22,746. The largest difference in salaries was between graduates with Diplomas and those with Associate Degrees or Certificates. Table 8 presents salaries by award type.

Award	Number of Respondents	Median Salary
Associate Degree	222	\$21,504
Diploma	38	\$15,417
Certificate	59	\$21,144
Total	319	\$20,802

Median salaries by ethnic origin ranged from \$18,894 to \$21,343 with Whites having the highest median salary and Blacks having the lowest median salary. Other minorities had a median salary of \$20,694. Table 9 presents salaries by Ethnic Origin.

Table 9: Salaries by Ethnic Origin

Whites	254	\$21,343
Other Minorities	11	\$20,694
Blacks	54	\$18,894
Total	319	\$20,802

Continuing Education

Of the 785 graduates responding to the question about continuing their education, 331 (42 percent) said they were attending a college. Note that 215 (65 percent) of the graduates were attending Trident while 33 percent were attending a 4-year college. Table 10 presents the number of graduates and the colleges they were attending.

Table 10: Attending College

College	Number of Respondents	Percent of Respondents

Other Technical/Business Colleges	3	1
Other 2-year Colleges	4	1
Total	331	100

Processes and Services

The survey instructed graduates to rate their satisfaction with processes and services offered by the college if they actually used the process or service. The question offered a choice of five levels of satisfaction, from very satisfied to very dissatisfied. The top two categories (very satisfied and satisfied) comprise the satisfaction rate. Satisfaction with all processes increased over last year except for "Availability of courses at convenient times" with a 3 percent decrease and "Career and Personal Counseling" with a 1 percent decrease. Table 11 presents a comparison of 1998 and 1999 satisfaction with processes and services.

Table 11: Comparison of 1998 and 1999 Satisfaction with Processes and Services

	19	98	19	99
Process or Service	No. of Resp.	-%		0/0
Description of offerings in College publications	645	86	561	86

Food services	546	70	455	74
Registration process	698	66	635	70

When processes and services were analyzed by campus, both Berkeley and Palmer rated "Attitude of non-teaching staff," "Career and personal counseling" and "Student Employment and Career Transition" higher than Main. Both Berkeley and Palmer rated "Library facilities/services," and "Food Services" lower than Main. Main rated "Academic Advising" lower than Berkeley and Palmer. The All Campuses column includes one Off-Campus respondent. Table 12 presents satisfaction rates for the college's processes and services by campus.

^{*}Includes one Off-Campus respondent.

Life Skills Accomplishments

The survey asked graduates if TTC was helpful in improving certain life skills. The five levels of possible responses ranged from extremely helpful to not helpful. The top two levels of helpfulness comprise "Percent of Helpfulness." Table 13 presents helpfulness in accomplishing life skills.

Table 13: Helpfulness in Accomplishing Life Skills

Life Skills	No. of Respondents	% of Helpfulness
Improvement in communication skills	634	79
Enhancement of self-confidence	630	76
Improvement in problem-solving skills	616	75
Improvement in science/tech skills	625	75
Increase in enjoyment in learning	620	74
Increase in ability to use computer	625	73
Cultivation of openness to ideas/ opportunities	629	72
Increase in ability to use math	621	69
Clarification of educational /career goals	548	69
Improvement in leadership/management skills	622	68
Expansion of awareness of global/multicultural society	619	60

When life skill accomplishments were analyzed by campuses, Berkeley Campus graduates rated two skills lower than college-wide rates and Palmer rated one skill lower. Differences were considered when the percentage deviated 10 percent from the college-wide rate. Table 14 presents differences in helpfulness in accomplishing life skills measured by Campus.

Table 14: Helpfulness in Accomplishing Life Skills Lower than College-Wide Helpfulness by Campus

Life Skills	Cam	pus	College- Wide
	No. of Respondents	% of Helpfulness	% of Helpfulness

Demographics

Demographic data for each respondent was retrieved from TTC's Student Information System datafiles, thus this information is presented for all respondents. Except for the "50 and Over" group, all age groups earned substantially more associate degrees than certificates. The "50 and Over" group earned nearly the same proportion of associate degrees and certificates (46 percent and 48 percent, respectively). Table 17 presents awards by age group.

Table 17: Awards by Age Group

For the past five years 60 percent of the respondents to the Graduate Follow-Up have been female; however, in 1999 the percent of female respondents increased to 64 percent. Females earned 64 percent of all awards compared to males who earned 36 percent of the awards. A larger proportion of males earned Associate Degrees and Certificates (99 percent) than females (87 percent), while 13 percent of the females earned Diplomas compared to one percent of the males. Females earned 62 percent of the Associate Degrees, 94 percent of the Diplomas, and 61 percent of the Certificates. Table 18 presents gender by award.

Total		727	100

General Conclusions

- Graduates continue to report higher satisfaction with processes and services than in past years. Rates increased in all 1999 categories except two.
- Full-time attendance by graduates has declined steadily since 1982 (the earliest date of compilation) when it was recorded at 82 percent. The 1999 full-time attendance of 56 percent by graduates is the lowest of any year.
- The two most successful methods of finding out about jobs are information from friends and relatives and direct application to the employer. However, a number of graduates said they used the internet to find their job. This choice was not included on the questionnaire in the past but will be included next year so that this method can be explored.
